

Child Friendly Solutions

Magic House

Interactive Touch Screen

Position it, plug it in and play! The most elaborate and sturdy machine in its class. The wooden casing is fully printed (digital photo print) and laminated with a plastic coating up to 1mm thick. The 17" TFT Touch Screen display is mounted on a pull out draw. The seat is permanently anchored to the base plate and offers ample room so that even two children can play simultaneously. The ready to plug in machine offers pure gaming fun and requires a standing area of just 116 x 79 cm.

The Magic House machine is mounted on castors and equipped with grip plates. By gently lifting the machine on one side it can easily be rolled to another location, thus making it very flexible despite its size.

Technical details

- ★ Age level: from 3 years old
- ★ Dimensions: Width 79 cm x Height 141 cm x Depth 116 cm
- ★ Weight: 110 kg

Cabinet

- ★ Laminated wooden casing
